CB-26P Fitting position

Citroen AX10

People ask how long the CB-26P will last. It's guaranteed for two years and this Citroen AX10 has done more than 65,000 miles with the device fitted without a hitch.

Still serviced by the Citroen garage they can't believe the emission readings when they do the MOT. The owner claims to get ridiculous petrol consumption figures (we think he could be exaggerating) but anyway it proves how durable the device is.

This is a carburettor car and the CB-26P is acknowledged as being particularly effective in providing a better fuel air mix especially in conditions that involve hard acceleration and deceleration as well as at higher speeds.
