CB-26P Fitting position

Fiat Marea 20v

Here is an illustration of the fitting for the Fiat Marea and is typical of the 2.0i 20v engines from John - apparently it works perfectly there and is relatively quiet with the PiperX Filter fitted.

Updated Sept 2005: "I've had my valve fitted to my Fiat Marea 20v for a few months now & it continues to deliver smoother torque/power delivery together with fuel savings."
