CB-26P Fitting position

Ford Puma 1.6 Zetec

A number of the later ford models have narrow gauge vacuum servo pipe such as this Ford Puma with a 1.6 Zetec engine.

Here you need to cut the pipe and sleeve over each end with 9.5 mm (5/16th) fuel/emission hose and two (or four for a thorough job) 13-16mm Jubilee clips. It's worth the trouble though - there is a noticeable improvement in responsiveness and fuel economy.

Improved response (particularly low down) and smoother running + some MPG savings at motorway speeds are common on these engines.
