CB-26P Fitting position

Nissan Micra

Here is the fitting for the Nissan Micra

On the POTN Forum they said:

"Cant believe the difference - it's amazing really, the car feels really powerful because the throttle responds much quicker and the induction noise is wicked! I've got a back box and a custom air feed to a K&N panel filter - the Ecotek is the most noticeable difference so far - this may be because of the other mods working together or because of the magic of the Ecotek I dunno.

I was really sceptical but took a chance - best £50 I've spent outside an ICE shop!"
